#### INFORMATION ON SURVEY

**PRINCIPAL INVESTIGATOR:** STEM  
**DATA COLLECTOR:** STEM  
**COUNTRY/GEOGRAPHICAL LOCATION:** Czech republic  
**FIELDWORK DATES:** April 3-9, 1998

#### Abstract:

The Trends is a monthly periodical survey of voting preferences and attitudes to questions topical in politics in the Czech Republic, which is prepared and fielded by STEM - Center for Empirical Studies, Prague. In April 1998, two months before the election to the Chamber of Deputies, a special module of questions was attached to the Trends 04/98 and surveyed for use of political party Freedom Union. The module was focused on political parties and their election campaign.

**Population:** adult people

**Units of Observation:** individuals

**Sample Size:** 2600

**Dimension of the Data Set:** 2168 cases and 94 variables

**Sampling Procedures:** quota sampling, quotas: age, sex, education, region, size of seat

**Method of Data Collection:** face-to-face standardized interview, 401 interviewers

#### Response Rate:
