2 – standard - data in SPSS format, technical information, survey instrument

INFORMATION ON SURVEY

PRINCIPAL INVESTIGATOR: STEM
DATA COLLECTOR: STEM
COUNTRY/GEOGRAPHICAL LOCATION: Czech republic
FIELDWORK DATES: May, 2-10, 1998

Abstract:

The Trends is a monthly periodical survey of voting preferences and attitudes to questions topical in politics in the Czech Republic, which is prepared and fielded by STEM - Center for Empirical Studies, Prague. In May 1998, before the election to the Chamber of Deputies, a special module of questions was attached to the Trends 05/98 and surveyed for use of political party Freedom Union. The module was focused on political parties and their election campaign.

Population: adult people
Units of Observation: individuals
Sample Size: 1800
Dimension of the Data Set: 1641 cases and 18 variables
Sampling Procedures: quota sampling, quotas: age, sex, education, region, size of seat
Method of Data Collection: face-to-face standardized interview, 421 interviewers

Response Rate:

response rate	91 %
total issued	
ineligible	
total eligible	
full productive	
total non-response	
refused	
non-contact	
other	

Weighting: none

Selected characteristics of population compared to the data file:

Known Systematic Properties of the Sample: none
